Dwarfism (Skeletal Dysplasia 2) - PCR

Result: Genotype N/N (Free)

Interpretation: The examined dog is homozygote for the intact gene. This dog does not carry the mutation described to cause Skeletal Dysplasia 2. This dog will only pass the healthy gene on to its offspring.

The result is only valid for the breed Labrador Retriever.

The current result is only valid for the sample submitted to our laboratory. The sender is responsible for the correct information regarding the sample material. The laboratory can not be made liable. Furthermore, any obligation for compensation is limited to the value of the tests performed.

There is a possibility that other mutations may have caused the disease/phenotype. The analysis was performed according to the latest knowledge and technology.

The laboratory is accredited for the performed tests according to DIN EN ISO/IEC 17025:2005. (except partner lab tests).
